ABOUT US

The purpose of our Center is to design and organize educational programs required by the information society, apart from associate, undergraduate, and graduate programs of our university.

With the rapid changes in business life, the necessity of acquiring information about new concepts and topics almost every day and applying this knowledge in a competitive environment has emerged. Continuous education carried out through individual effort forms the basis of competence, effectiveness, and productivity.

All programs offered by our Center are prepared by our academic staff with sectoral experience, adopting an approach that aims to combine theory and practice. At the end of the training programs, participants are awarded certificates.

We invite all individuals who wish to gain a competitive advantage to participate in the training programs of our Center, whose philosophy is expressed with the words: “Education is meaningful only if it is continuous.” All training programs offered by our Center are accessible to everyone regardless of ethnicity, religion, disability, migration status, or gender.

“Learn everything about something, and something about everything.”

— Van Dyke

Mission & Vision

To provide education that creates high value for individuals, institutions, and society by identifying continuously changing human resource needs in the sector and integrating them with the requirements of the age and the conditions of the society we live in; and to contribute to the formation of a qualified workforce capable of advancing Türkiye and successful in human relations.

To be an educational institution that contributes to the country's qualified workforce through education and consultancy activities, trains the skilled labor force required by the market, and supports individuals' Lifelong Development process.
